

Dear partners,

In order to extend the life of the battery, Kilews suggest below timing for battery recharge and keep the environment temperature as **-20 ~ 30 °C**.

- For SKC-LB1815, LB1820 and LB1820B in stock, Kilews suggest to recharge **every 3 months**.
- For SKC-LB1830 and LB1840 in stock, Kilews suggest to recharge **every 6 months**.

Kindly follow above recharged timing and the environment temperature to extend the life of the battery.

Otherwise, it will not only damage the batteries cells function, but also reduce batteries capacity and shorten batteries life.

P.S. Your confirmation of the message by return is necessary for us, thanks for your cooperation.

Best Regards,

Loover-Kilews Industrial Co., Ltd.
