

Dear Partners,

As you know power torque screwdrivers (SKD-RBN350 / RBN500) can replace pneumatic screwdriver due to pneumatic tool has no output signal for production management.

Recently we got some feedback from customers the **SKD-RBN350L has some problems when operate with some special soft joint application,**

Actually, for power torque we are providing a solution according to customer's demand, therefore, in order to avoid same problem happened,

Please must go to customer side to check real application and feedback to us for evaluating firstly, we will evaluate the condition and give you our suggestion.

Thank you for your attention.

Best Regards,

Loover-Kilews Industrial Co., Ltd.
