Dear Bob

In reply to your inquiry by Skype on March 9th, about ASA screw feeders asked, Kielws TW reply as below.

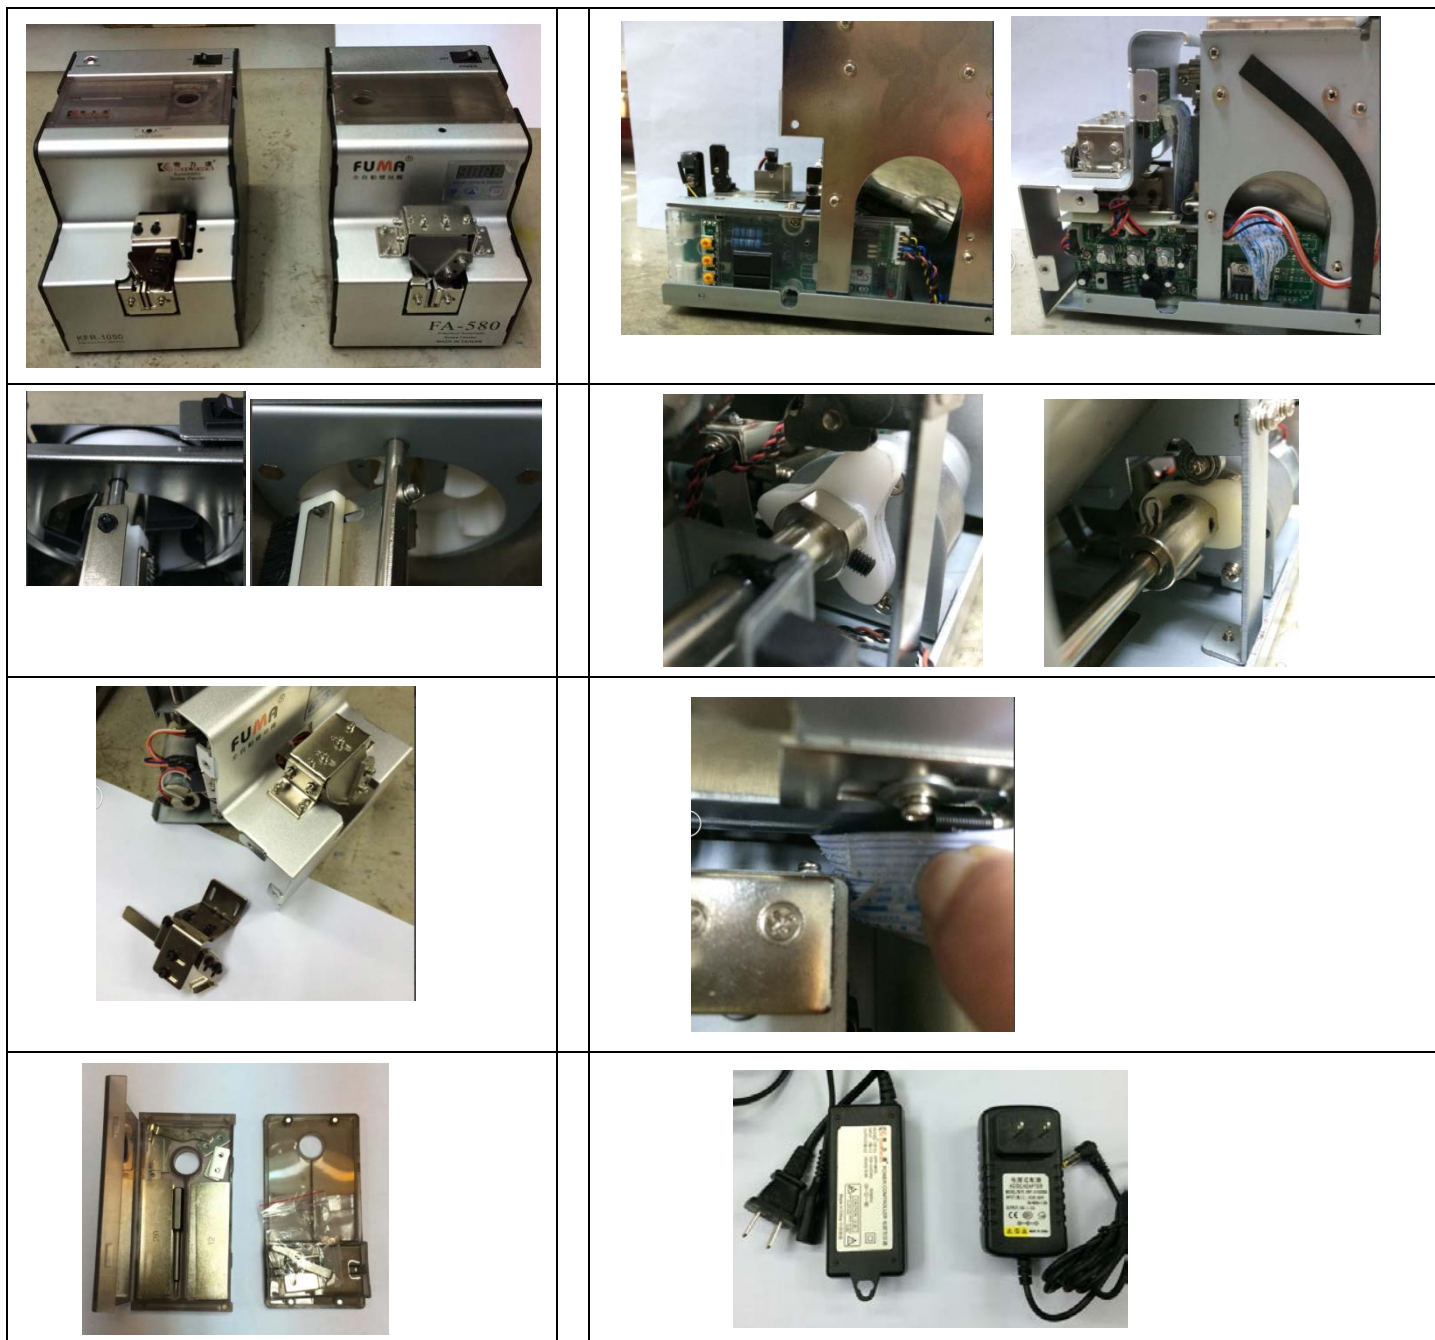

- 1. Kielws have not got selling prices about ASA screw feeder in the market yet.**
- 2. There is a list of comparison between KFR-1050 and ASA FA580, enclosed, for your reference.**
- 3. Kilews KFR-1050 have not encounter any special challenge& threat in the market until now.**

Thanks

THE COMPARISON BETWEEN KFR1050 AND FA580

160322

KFR-1050(left) V.S. FA-580(right):

The Shortages of ASA FA580 under comparison with KFR-1050:

1. Poor craftsmanship.

No case to PCB, easy shortcut. No grounding, easy ESD caused.

More plastic materials are used at inner part.

2. Problems on use

Slow speed from brush of both-gear drive, screws fall easy stuck in rail.

Basically, small screws are not easy to apply.

3. Problems from motor

Because of issue of motor, both vibration and roller are slow for the extension of life-cycle.

4. Repair' s inconvenience

Since guide plate is set on the outer case, adjustment is needed after repair.

5. Others

(1). Cables are easy torn under vibration, and possible leaking electricity concerned.

(2). Poor top cover, without rail-fixture plate.

(3). Traditional plug(110V or 220V) .

Note: Plug of KFR-1050: computer-use plug, 100~240V,
connected with various plug available.
