

Dear Partners,

This is related to the kilews new launched Smart Tool Products **KL-AMS**; which is work with KL-CTDS (Current torque display system) that be able to monitor the necessary fastening data on computer in real-time via Wi-Fi transmission,

KL-AMS is in charge of data received, store and send files and data to other computers on a network to achieve factory production fastening job quality control and management.

● **KL-AMS features:**

1. **Fastening data received and storage.**
2. **AMS software program can display current fastening data in real-time.**
3. **Production line fastening job quality control and management.**

● **KL-AMS contains the following items:**

1. **KL-AMS - Server**
2. **AMS software (Installed)**
3. **Router**
4. **Wireless module**

Best Regards,

Loover-Kilews Industrial Co., Ltd.
